## 2024 CSTE Annual Conference Sponsors & Exhibitors

The CSTE Annual Conference is a unique, energetic gathering of applied public health epidemiologists and practitioners from across the U.S. and its territories. Attendees meet to share knowledge, best practices, current trends and professional challenges in the field, and carry this information back to their jurisdictions. By supporting the CSTE Annual Conference, your organization will heighten its brand recognition and profile with thousands of attendees. You'll network with relevant public health professionals to educate and inform them of your products and services.

## CSTE Members Matter

CSTE is the professional home for applied epidemiologists representing multiple levels of public health practice. Members have surveillance and epidemiology expertise in a broad range of areas including occupational health, infectious diseases, environmental health, chronic diseases, injury, maternal and child health, and more. Our members serve public health by delivering high quality data through modernization efforts and advance health equity through improving overall public health policy. CSTE supports effective public health surveillance and sound epidemiologic practice through training, capacity development, and peer consultation.
